

## T12 — Cleanup and Rollback Register

Populated **during Phase 4**, as each modification is made — not reconstructed at the end.  
Closed out at Gate G5.

Forgotten implants, live accounts and orphaned infrastructure are the worst red team incidents. They create real, uncontrolled risk that outlives the authorisation, and they are discovered by someone else.

Assign the stable item IDs below when an item is first recorded. Do not renumber or reuse an ID. Carry it into T05, T08 and any transferred action.

| Field                | Value |
|----------------------|-------|
| Engagement reference |       |
| Code name            |       |
| Execution window     |       |
| Register owner       |       |

## 1. System modifications

| Item ID | Date/time<br>(UTC) | Operator | Host /<br>system | Modification<br>made | Type | Removal<br>method | Removed<br>(UTC) | Removed by | Verified by<br>(2nd<br>person) |
